1932 — OLD CUSTOMERS — NEW — 1932

Finishing one of our busy years in which we made many improvements at our plant, we again offer the public our wonderful improved stock of bulbs at wholesale prices. Also we offer a new line of Winter Cut Flowers from our new greenhouse.

Thanking our customers for their many letters telling of their wonderful luck with our stock. We again wish you all a prosperous and successful season.

THE SEVEN ACRES.

DELIVERY PAID ON ALL ORDERS $3.00 OR OVER, SMALLER ORDERS PLEASE INCLUDE POSTAGE

INFORMATION

The different varieties of Dahlias we have abbreviated as follows: Decorative, D.; Peony, P.; Cactus, C.; Hybrid Cactus, H. C.; Show, S.; Pom Pom, P. P. Where the variety favors two different types, both are mentioned.

We guarantee all bulbs and plants true to name and to arrive in good condition. If not satisfactory when received, notify us at once.

Cash with order or in advance of shipment. No C. O. D. Orders. Please state when you wish your order shipped. Otherwise it will be sent at planting time.

STRONG PLANTS ON SOME OF THE NEWER VARIETIES AT ONE-HALF PRICE OF BULBS NO PLANT LESS THAN $1.00

GROWING THE DAHLIA

Location: Open, sunny or partial shade. Cultivate the soil thoroughly. Plant from May 1st to June 20th. Dig a hole one foot deep. Put in shovel of manure or other plant food. Cover with an inch of soil. If stake is to be used, set in. Plant bulb four inches deep, horizontally, and cover. Cultivate at least once a week. Do not water until the plants are well above the ground. When the buds appear water the plants thoroughly once or twice a week. Apply any good fertil¬izer every ten days, stirring the soil lightly after. To obtain extra large flowers, disbud freely, leaving only a few buds and branches on each plant.

Green plants should be planted TWICE AS DEEP as they were grown in pots or 4 or 5 inches deep. They should be watered and shaded for a few days after planting.

CUT FLOWERS

Cut the blooms any time, removing all buds, branches and leaves. Put in a cool place (ice box preferred), in cold water for a few hours before using. Keep away from drafts.

|       | Derrill W. Hart, D—Considered by many growers to be one of Mr. Broomall’s greatest originations, anyway it was good enough to win many high honors in the keenest competition and found a place on the Roll of Honor by Mr. Derrill W. Hart. Color, sapucine yellow, shading to grenadine red, in cold weather almost a copper color. The large well-form-

BULBS THAT GROW
ed blooms are held erect on long stiff stems. Universally admired by all who saw it.

Elkridge, H. C.—A large flower of purest white and the most vigorous white Dahlia we grow. Very few Dahlias of any color produce so many flowers. Blooms are large and are set well on stems. Medium height .

Eleanor Martin, D.—Large beautiful and different in color from any other Dahlia. Gold, almost obscured by magenta. Center rosalane purple; 7 to 8 inches; medium height. It blooms under all conditions.

Ellenor Vandeveer, D.—Rose pink, one of the best.

Elsie Daniels, D.—Large, pale violet orchid on good stems, very good.

F. W. Fellows, C.—Orange and scarlet.

Fort Monmouth, H. C.—One of the giant of the Dahlia world, growing 13 to 14 inches over a tall, robust plant, 7 to 8 feet in height. Very prolific, frequently 5 or 6 immense blooms open at one time, on stems 3 to 4 feet long and stiff as canes. A rich, crimson maroon and a fine keeper. A most spectacular Dahlia and a constant winner in Largest Bloom Class. Won for us as largest and best bloom at Portsmouth and Boston.

Goodnight, D.—We have grown many fine dark colored Dahlias, but we find in this variety a monster in size and the rich color of ox-blood red shaded maroon, is the greatest attraction in the garden and in the show-room. One of the outstanding Dahlias at the National Flower Show at Atlantic City, winning first prize for first basket. A sure winner.

Harry Mayer, D.—A great Decorative Dahlia of pale rosaline purple, reverse of petals veined with a deeper shade. The blooms are of fine formation, are very large and held erect on stiff stems on medium plants carrying four to six exhibition blooms at a time.

Ida Perkins, D.—This clear white Decorative won the Garden and Home Builder medal at Boston for the best New England Dahlia ever before shown at Boston 1927. A true Decorative with very great substance.

Independence, D.—Large, well set up flower of mauve pink or lilac on strong stems.

Jane Cowl, D.—One of the three best varieties in existence and a queen among exhibition flowers. Blooms are large, have good stems and many are produced in a season. Color is mikado orange with petals shaded heavily on reverse with peach red and center of flower shades to brazil red. Its great vigor and ability to bloom no matter how bad the seasonal conditions is responsible for its great success in every part of the country. It produces a large clump of roots. It is at the head of the Honor Roll.

Jersey’s Beacon, D.—Chinese scarlet, very large and attractive flowers on strong stems.
Bulbs

Jersey's Beauty, D.—Beautiful pink, cut flower ......................................................... .50
Jersey's Gleam, D.—Very free blooming Dahlia, medium size, coral pink, very good habits for garden varieties ................................................................. .45
Jersey's Mammoth, D.—Very large flower, golden mahogany, extra value ................................................. .40
Jersey's Masterpiece, D.—A very well set up flower, nice, snappy, stylish shape, good size, strawberry pink, on strong stems ............................................................................. 1.25
Jersey's Wonder, D.—Large orange yellow, good ............................................................... 1.00
Jim George, D.—A most beautiful garnet velvet, large and good habits ...................................................... .45
Judge Marean, D.—Salmon, orange and red ....................................................................... .50
Kathleen Norris, D.—Another season has but added to the lustre of this most wonderful Dahlia. The judges of four leading shows gave it the highest awards in 1929, but its winnings in 1930 were legion. It won in practically every show entered, in its class. Blooms are of gigantic proportions, a true rose-pink, later deepening to mallow pink. Broad overlapping petals with twisted ends, and center always full and on stems that hold it right up to be admired. Foliage dark green and leathery and positively insect proof. One of the most beautiful Dahlias ever introduced. A limited number ................................................. 3.50
Kentucky, D.—Once every so often a truly great Dahlia appears on the market, a super Dahlia that thrives in any soil or climate. A variety that holds well when cut, a new variety that produces a good crop of tubers that will keep. Jersey’s Beauty is such a Dahlia. It has held its own with the best introductions from east to west. It does well everywhere. We now have this same Jersey’s Beauty, with a new color, in the variety Kentucky. A sport, with all the good qualities of Jersey’s Beauty, in a wonderful new shade of color, unlike any other variety we have seen. A brilliant light salmon-orange, shading to orange yellow at base of petals and deepening to grenadine pink on outer petals. This great Dahlia has been tested for four years and its color has never varied a single time. The originator rated the parent of this new Dahlia the best in cultivation, but says we have a better one in the variety Kentucky ......................................................... 5.00
Kemp’s Violet Wonder, D.—Bright, royal purple, an unique and absolutely new shade. An impressive flower with its great size and depth carried on grand stems ................................................................................. 95
King Midas, D.—A georgous, deep, golden yellow and considered by Derrill W. Hart as one of the six greatest exhibition Dahlias of Eastern origin, and a constant winner. Will produce 6 to 8 immense exhibition blooms at one time and on perfect stems ................................................................................. 4.00
Little Jewell, D.—The daintiest little flower imaginable. A pure, tiny pink ............................................................................................................................................. 50
Marmion, D.—The largest of golden yellows, the blooms averaging 8 inches. The bushes are

BULBS THAT GROW
very vigorous and nobody ever passes Mar¬
mion by; it is altogether too bright to escape
attention. Though not new, it still holds its
top notch popularity. Medium to tall ...........

Maid Marian, H. C.—Something different in for¬
mation, large, rose pink with curled and twist¬
ed petals ........................................ 75

Marion Weller, D.—Beautiful pink, good habits .90

Mariposa, H. C.—Pink and violet, one of the best .45

Massachusetts, D.—Awarded Certificate of Merit
by American Dahlia Society and Dahlia So¬
ciety of California. Winner of many first
prizes. The color is a gorgeous shade of am¬
aranth purple, the tight center petals pansy
purple, outer petals shading Syrian rose.
Immense flowers on good stems, splendid for ex¬
hibition .................................................. 1.00

Maud Adams, S.—White, tinted pink ................ 25

M. H. DeYoung, D.—This season we cut freely
of this fine Dahlia using blooms to fill our
florists' orders and they were fine. The best
cut flower gold Decorative we had. This old
flower is hard to beat when cut-flower quali¬
ties are considered. Old gold or empire yel¬
low shaded salmon, as you wish. Perfect
and unsurpassed for beauty in its class ...... 40

Miss California, D.—Beautiful new color, Ori¬
tal fuchsia, good stem, style and size ........ 50

Miss Longview, H. C.—The best of Miss Tyler's
1929 introductions. This huge Dahlia is
bright canary yellow, reverse jasper red,
which suffuses the many other rows of petals
as they mature, giving them a soft, salmon
tone, while center retains its yellow color.
The whole flower has a glisten and sheen, and
grows 10 inches across and 6 inches deep
without disbudding—and on long, cane-like
stems. A worthy rival of the great Mar¬
mion .................................................. 5.00

Monmouth Champion, D.—Winner of a special
award at Elizabeth, N. J., and as best undis¬
seminated seedling at Red Bank, N. J., where
it defeated some of the top notches. This
great Dahlia compares favorably with Fort
Monmouth, Violet Wonder, Jane Cowl, Kath¬
leen Norris, and other top notchers of recent
introduction. It instantly found favor with
all who saw it in our gardens and the show
rooms by its great size, and brilliant orange
flame color that fairly glistsens from its own
color. It is the only dahlia we know in its
color. A beautiful Dahlia in the garden and
show room and a free producer of large, per¬
fect blooms, on perfect stems throughout the
season. Plant is a strong vigorous grower,
wide spreading with long slender side shoots,
each producing a fine exhibition bloom from
10 to 12 inches in diameter that can be cut
with stems 2 to 3 feet long .................................. 5.00

Mrs. Alfred B. Seal, D.—Described by the origi¬
nator as follows: "Undoubtedly the largest
and finest pure, rich, glowing, old rose Dah-
Bulbs

Dahlia ever produced — nothing we have ever seen can even remotely approach it. Such an unusual coloring — the softest, richest shade of pure, glowing old rose imaginable. The flowers are huge, measuring with Siskiyou, and of great depth and substance, and held proudly erect above a tall, strong bush. It won at Palace Hotel, the Garden and Home Builder Achievement Medal for Best New Dahlia, originated west of the Rocky Mountains. New for 1929 and the outstanding Western Dahlia of the year

Mrs. Frank Dunbar, D. — This beautiful new Dahlia is a most charming shade of clear lavender. The formation is perfect. The stems are long, strong and straight, holding the flower well above the foliage

My Country, D. — In the red and white class. A 9 to 10 inch bloom, of great depth, on stiff stems, facing. The 2 inch wide petals are pure white, edged with deep garnet, later turning to all garnet at base tipped white. Thrifty grower, but not tall and needs no stakes. Prolific. A striking novelty

Nancy Sue Lang, H. D. — Immense flower, red tipped with gold, very attractive

N. C. 4, D. — Scarlet and cream, quite striking

Nature's Jewell, H. C. — Here we have one of the most profuse bloomers of all Dahlias, always in bloom. Good sized flowers of pale flesh lavender and tinged purple

Nature's Masterpiece, D. — A new Oregon Dahlia of special merit, color combination of old rose, cinnamon and metallic bronze with violet reflex on reverse of petals; extra long strong stems which hold the large blooms above the foliage

Our Country, D. — Deep purple, tipped white

Paul Revere, D. — (Bissell) Very large, velvet red, does not burn in hot sun, good stem; one of the best reds

Pride of California, D. — Large, red Decorative that cannot be beaten

Pop Stewart, D. — This is a remarkable flower of great size. In the young stage the petals appear rosy pink but as it matures the flower undergoes a complete transformation, toning out into a most exquisite shade of the purest lilac-pink. It is a wonderful grower, with splendid stems. Awarded many prizes

Prince of Persia, D. — Without exception the very finest red Dahlia we have ever had. New, different and unbelievably beautiful. The immense flowers, frequently a foot in diameter, are of the deepest, most iridescent, rich glowing crimson, like the petals of a rose, rather than a Dahlia; of great depth and substance, and carried perfectly erect on exceptionally long, stiff stems. The bush is of a most vigorous growth and very tall, so that the Prince of Persia looks down on the average Dahlia in a truly royal manner.

**BULBS THAT GROW**
Net Prices

Bulbs

Dahlia undoubtedly will be extremely popular as it has every good trait. Stock exceedingly limited. Price per strong, field grown, divided root ........................................ 15.00

Queen of the Garden Beautiful, D.—A gigantic lemon colored Decorative of perfect type. One of the largest Dahlias, measuring from 9 to 12 inches across, and 5 to 6 inches deep. The stems are unusually strong and it is a wonderful keeper ........................................ 0.50

Radio, D.—Very large, blood red, edged and tipped yellow. Good for exhibition .......... 0.40

Regal, D.—The largest 1928 introduction of Bes-sie Boston's. Regal is a Gold Medal Dahlia. The immense Dahlia is a combination of autumn shades, bronze heavily suffused with old rose and shading to gold at the base of the petals, giving an effect of burnished copper. The flowers grow well out of the foliage on long, rigid stems, the first bloom, however, if the bush is not pinched back will have only 12 inch stems. This is a variety that will produce many 10 inch blooms, but by generous disbudding can be grown to at least 12 inches. Regal has been a great prize winner at the Palace Hotel Show. This remarkable Dahlia made a fine showing in our garden this year ................................................ 0.85

Regina Coeli, D.—Was awarded a Certificate of Merit. A beautiful white Dahlia; formation of the flower puts it in a class by itself. We have received enthusiastic letters from customers stating it to be all that we claimed it to be ........................................ 1.00

Robert Treat, D.—American beauty shade, beautiful ................................................ 0.45

Rockwood, D.—Pure bright cerise rose, immense flower, splendid straight stems, free bloomer ........................................ 0.50

Rodman Wanamaker, D., P.—Golden bronze and salmon pink. This is one of the largest and most beautiful Dahlias on the market; grand for exhibition or garden purposes ........................................ 0.65

Rolo Boy, H. C.—Very large amber on strong stems ........................................ 0.75

Roman Eagle, D.—Large exhibition flower of brilliant copper, nice formation .............. 0.45

Rosa Nell, D.—Bright rose ........................................ 0.35

Salem Pride, D.—Large flower on good stem, strong growing plant, color varigated pur-ple, white and tinged yellow ........................................ 3.50

Santa Anna, D.—Salmon rose and gold, large, classy flower, good stems ........................................ 1.00

Santa Barbara, D.—This California introduction has won many prizes, the Achievement Medal for the best Dahlia introduced for the season 1929-30, first prize for the best pink Dahlia, and silver trophy cup of the best twelve Dahlias of one variety at the Palace Hotel Show given by the San Francisco Dahlia Society. Santa Barbara also won the following: In 1926, first prize for best two year old seedling; in 1927, first prize for the best Dahlia ................................. 0.30

Guaranteed Bulbs
in the show; also Gold medal for best three year old seedling; in 1928, first prize for the best Dahlia in the show. The color is an intense clear pink, with a suggestion of a suspension of salmon pink. The big flowers are held high above the foliage on stems stiff as canes, and look one squarely in the face. The medium tall bushes are very strong and hardy .......................... 5.00

Selbach’s White, D.—Very prolific, white, fine for cut flowers .................................. .65

Senorita, D.—Rich velvety crimson .................................. .45

Shahrazad, D.—Occupies the same position in a deep pink as Mrs. Alfred B. Seal and Prince of Persia do in their shades. A gorgeous new variety that cannot fittingly be described. The flowers are easily grown to a foot in diameter, with great substance and depth, and are carried absolutely erect and straight on rigid, cane-like stems. We call Shahrazad our deep pink Jane Cowl, and it resembles this beautiful Dahlia in many ways. The bush is tall and exceptionally vigorous. Named for the queen in the “Arabian Nights,” it expresses pride and every queenly attribute. Stock very limited. Price per strong, field grown, divided root .................. 15.00

Starlight, C.—Winner of the Santa Barbara trophy for best twelve blooms at the Palace Hotel Show in 1928. Color is pure unshaded gold. It combines well with almost all home decorations. Flowers are large, bushes fairly tall, robust and branching. Stem is long and rigid, carrying blooms well above the foliage ..... .90

The Bandit, H. C.—Large flower on very strong stems, of very unusual coloring, being made up of three colors, spectrum red, reverse, buff, yellow, with twisted flower .......................... .45

The Bashful Giant, D.—Apricot shading gold. Mammoth flower, good for garden and exhibition .................................. .35

The Eagle, H. C.—Sulphur yellow, large flowers, good keeper. Long, stiff stems, very prolific .......................... .35

The Flying Ambassador, H. D.—Very large creamy white with touch of lavender on back, on strong stems .................................. .90

The Giantess, D.—Immense, amber, good .................. .40

The Surprise, D.—This is one of the best of the new ones. Very large, deep and good stems; mulberry or rose wine color .................................. .45

The Telegram, D.—A very large golden yellow, heavily tipped white, on long, strong stems ............... .40

The World, D.—This wonderful new Dahlia was selected at the A. D. S. Show in New York by Mr. J. D. Sullivan of the New York World. The coloring is an unusually rich, deep rosy magenta overlaid garnet with silver shadings on edges of petals. A rich and beautiful combination of colors. Perfect, full centers. Stems are strong and erect. Foliage leathery and repellant to insect injury. This greatly admired Dahlia is sure to please you. ..........................

Do Not Plant Near Building

GROWING THE GLADIOLUS

Where to Plant. Plant in a row in the vegetable garden. Run rows north and south when possible. Plant in the full sun. Do not plant within 20 feet of a large tree or within 5 feet of a hedge.

Preparation and Planting. Enrich the bed with barnyard manure in the fall, spading it in.

About the first of May open a trench 6 inches deep and 8 or 9 inches wide; spade in a little bone meal or sheep manure, or both mixed.

Level the bottom of the trench and plant the bulbs pointed side up, 6 inches apart each way, 2 staggered rows in a trench—this way:

Cover with 3 inches of loam and walk in the trench after the bulbs are covered (this packs the earth tightly around the bulbs and prevents “dead air spaces”). Rake level. As soon as the green shoots begin to break through fill in the other 3 inches. This is much better than filling the entire trench at once, as it takes a long time to properly warm the soil at a depth of 6 inches.

Cultivation. Cultivate often, never allowing a crust to form. Always cultivate after rain, in order to conserve the moisture.

When the flower spikes begin to “shoot,” weak liquid manure is very beneficial.

Cutting. In cutting care should be taken to leave at least 3 or 4 leaves on the stem which is left, in order that the bulb may grow and mature for next year. Spikes should be cut when the first flower is entirely open and bloomed in the house.

Harvesting. In the fall when the foliage begins to turn yellow the bulbs should be dug and the tops cut off clear down to the bulb. They should be cured in the sun and after two weeks the dried-up old bulb taken off and the new bulbs stored in the cold storage cellar.

A temperature as near to 40 degrees as possible is best.

MIXED GLADIOLI

$3.00, $4.00, $5.00, $10.00 per hundred
Special Collection, 25 for $1.00
35c, 50c, 75c, $1.00 per dozen

GUARANTEED BULBS
SEPARATING THE CLUMP

Cut stock close to bulbs, turn clump upside down and put strong knife or hatchet in the center, pound it until you make two halves. Avoid breaking neck of bulb. Then take hock or straight knife and cut off bulbs, being sure they have an eye, leaving on as much crown as possible. A pair of canvas gloves with the right thumb heavily taped will be a help.

Special No. 1 — $1.00

BULBS THAT GROW
KEEPING THE BULBS
By L. N. Davis

There are almost as many opinions as there are growers on keeping the tubers over the winter. This is perfectly right, as every cellar is different, and this means a decidedly different method for storing and preserving one's bulbs.

First of all, I would suggest that everyone keep a thermometer in the cellar, for only in this way can you tell how hot or cold it is.

Now the bulb itself must be taken into consideration. Is it large or small? Has it a tendency to decay easily, or maybe to dry or shrivel up to almost nothing? This is the time when the evil of overfeeding for large flowers in the summer becomes apparent. If you take several clumps of good bulbs, all the same kind, put them in storage in the same box, in a short time, the clump that has been forced or fed heavily will begin to decay, or, if small sized, will dry up, while those grown without any food will be found O. K.

Next to be considered is the cellar where the bulbs are stored. Generally the old fashioned, dirt bottom cellar, without heat of any kind, is almost perfect. About the only care for these bulbs is to pile on the floor and cover with burlap bags if they show any signs of wrinkling or drying up.

In a cellar with a small amount of heat, pack the bulbs in boxes or barrels, lined with newspaper and cover top with more paper. Watch for a few weeks after packing, and if they start to mildew near crown, take off top paper and give the moisture, which is always coming out of the clumps, a chance to escape.

In a cellar of 45 degrees or 50 degrees, or warmer, with cement bottom and heater, the bulbs will need more protection from the hot, dry air. Pack in shallow boxes, about 8 inches high (vegetable bushel boxes are perfect) and cover with shavings or sawdust. Look at the bulbs four times during the storage period, November 30, January 1, February 22, and April 1. If they are in good condition, they can be packed away again, but if they have started to decay, cut off all the decayed parts and apply powdered sulphur or air slacked lime to the parts that have been cut.

In a very warm, dry cellar with cement floor, where the temperature goes from 45 to 65 and even in the cold storage closets of such cellars where more or less heat will get in, the following treatment has proved successful. The bulbs when dug should be placed at once in shallow boxes (if the earth isn't too wet or soggy.) Do not shake the dirt from the clump and, after placing in the box, fill in with more loam, not too deep, about 6 inches. Set boxes on or near the floor. If lack of space compels you to place boxes on top of each other, be sure to put wooden braces between the boxes, to prevent resting tightly on top. Circulation of air is necessary to keep the moisture escaping from the tubers.

You can see that the keeping of bulbs rests wholly with the individual and his cellar conditions. The atmosphere in every cellar is different, even with the same heat. If you have had success your way in storing, my advice is don't change. But if you haven't had good luck keeping bulbs, try one of the other ways. Bulbs can be successfully wintered if you find out your cellar conditions, then treat them by the methods suggested. Remember, if one man can keep them over the winter, you, too, should be able to do the same.

Yours for better luck in storing.
How To Reach The Seven Acres

Take electric cars at Sullivan Square to end of line in Stoneham. Three minutes walk north.
